

Electrical Equipment Declaration (EED)

RedFest 2018

All electrical equipment used at RedFest must conform to the Electrical Safety Regulation 2002, Section 83, definition for Div 5, 'construction work', 'service work', 'amusement work' or 'office work' and Subdivision 5, Section 93, for tagging and testing.

All electrical cables that cross pathways or lawn areas must either be covered by cable covers or alternatively flown a minimum of 2.4m above the ground. No cables are to be attached to trees and/or other structures that are not part of your site.

An inspection of your site will occur to check your equipment against what is included in this form. Therefore, every piece of equipment must be listed below.

The following information is mandatory:

Description – Please tell us what it is i.e. cash register, toaster, bain marie.

Test and Tag – All equipment must have a current electrical tag. The information must be up to date and includes number, test date, test due date. See example to the right.

Watts/Amps – On every piece of equipment compliance plate will be visible (usually underneath or on the back). This contains information about the wattage or amperage of the equipment i.e. 50HZ 700W. See example to the right.

All electrical items that will be plugged into the RedFest power supply must be tested and tagged. LED lights are fine as they are not plugged into our power.

DESCRIPTION	WATTS	TEST DATE	TEST DUE DATE
Example: Kettle	2400 watts	1/6/18	1/6/19
